Instagram / Photo and video-sharing social networking service. Supports payed ads.

Telegram / Cloud-based instant messaging and voice over IP service. Supports groups and channels.

Twitter / microblog, 280 characters each tweet. Supports images, animations and hashtags.

Technologies
Cryptoart engines.

Ethereum / Global, open-source platform for decentralized apps. Ether is the cryptocurrency.

Ipfs / InterPlanetary File System, peer-to-peer hypermedia protocol.

Wallets
The interfaces to the platforms.

Coinbase Wallet / The secure app to store crypto yourself.

Fortmatic Let users access your Ethereum app from anywhere.

Metamask Crypto wallet and gateway to blockchain apps.

Portis Wallet Non-Custodial Blockchain Wallet that Makes Apps Simple for Everyone.

Trust Wallet Secure Crypto Wallet for Android and iOS.

WalletConnect Open protocol for connecting Wallets to Dapps.

Etherscan / Explore transactions, addresses, tokens, prices and other activities.

File formats
Artworks should be these kind of data.

GIF / Graphics Interchange Format, up to 256 colors. Supports animation and static raster graphics.

JPG/JPEG / Joint Photographic Experts Group. Compressed and lossy image file format.

MP4 / MPEG-4 Part 14. Digital multimedia. Compressed video. Supports audio.

PNG / Portable Network Graphics. Raster format that supports lossless data compression.

SVG / Scalable Vector Graphics. Vector format for two dimensional graphics. Interactive and animated.

WebP / Image format employing both lossy and lossless compression.

WebM / Audiovisual media file format, royalty-free and HTML5 compatible.

Cryptoart Ecosystem
in Alphabetical order

SuperRare

https://superrare.co/

KnownOrigin.

https://dapp.knownorigin.io/

makersplace

https://makersplace.com/

OpenSea

https://opensea.io/

Why these 3?

They have built active communities of likeminded artists and collectors, making/participating in cryptoart festivals and are constantly improving their platforms

On different platforms you can issue different quantity of editions:

SuperRare - only 1

KnownOrigin - up to 25

MakersPlace – unlimited

OpenSea - 1

Everytime you sell artwork on any of these 3 platforms,

you receive **85%** and the platform automatically gets **15%** commission.

Royalties

As an artist you have royalties,
that means that every time somebody resells your artwork
you will automatically receive a % of the price payed by the buyer.

SuperRare – 10%

KnownOrigin – 5%

MakersPlace – 5%

OpenSea – you choose – recommended is 5-10%

On secondary sales platforms receive:

SuperRare – 3%

KnownOrigin – 3%

MakersPlace – 10%

OpenSea - 2.5%

You can create your own **NFT Marketplace,**
and here's a step-by-step walkthrough on launching your first
crypto-collectibles marketplace using **OpenSea:**

https://medium.com/opensea/how-to-create-your-own-marketplace-on-opensea-in-three-minutes-or-less-12373ca5818a

**You only need to complete steps from the beginning
and until the 'OpenSea Storefront' section.
No coding skills required.**

Tokenize without onboarding:

Pixura   https://pixura.io/

Mintbase   https://mintbase.io/

Mintable   https://mintable.app/

Rarible   https://rarible.com/

Owning a SuperRare item is analogous to owning a physical artwork,

like an original painting or print.

Ownership does not include intellectual property rights such as copyright claims,

ability to produce commercially, and create merchandise therefrom, etc.

The intellectual property remains the possession of the creator.

Buying digital art on SuperRare is just like buying an original painting or print from an artist:

It does not transfer the Artist's copyright to the Collector.

The Collector receives true ownership, that is, he or she acquires the right

to display and resell the digital art to another collector if they wish.

But the Artist does not give up copyright,

meaning Collector cannot prevent artist from using it for further commercial work,

and Collector has no right to use it for commercial purposes.

Successful CryptoArtists:

+ **Have a website**

+ **Have an active Twitter & Instagram profiles**

+ **Active in the cryptoart community on Twitter, Discord & Telegram**

+ **Have real world exhibitions**

+ **Have virtual exhibitions/galleries on CryptoVoxels or Decentraland**

+ **Exhibiting their art on blockchain+art festivals/exhibitions**

+ **Have a unique style and concepts**

+ **Have artists profiles on all 3 major platforms**
